

“Responsible and dedicated by providing the best Service, Security, Safety and Compliance (3S1C)”

Based on the international regulation and airlines requirements, all cargos must be checked through processes which include; Aviation security cargos, Cargo - checked labelling, and Transshipments to terminal cargo to secure and bring safety to the properties.

Angkasa Pura Logistics handles projects of over dimension cargos. From the simple one to the most complex projects. Specialized vehicles, oversized cargo, multimodal shipments and customized logistics are our expertise. With trusted collaboration and advanced development, we are reliable partner - worldwide. Rigorous - planning - detailed, good quality control, and superior execution are the key elements of successful project logistics.

To fulfill our customers demand efficiently, our cargo terminals are professionally managed with careful emphasis on safety, accuracy, speed and punctuality. Armed with professional, best trained human resources, as well as logistics and information system of most advanced stage, we rapidly expand our business and constantly innovate to bring our aspiration of becoming the most trustworthy and well - integrated logistics company into reality.
